Professional Summary

Motivated Computer Science student specializing in Artificial Intelligence, Machine Learning, and IoT, with hands-on experience building data-driven and scalable applications. Proficient in Python, Flask, and modern frontend technologies, with a strong focus on real-time systems and AI-powered solutions. Developed projects involving LLMs, voice interaction, and predictive analytics, aiming to solve real-world problems through intelligent automation. Passionate about continuous learning, innovation, and delivering high-impact tech solutions.

EDUCATION

- **GLA University, Mathura, UP**
B.Tech in Computer Science | GPA: 7.34/10 | Ongoing
 - **Colonel Brightland Public School, Agra, UP**
12th | GPA: 7.38/10 | Jun 2021 – Aug 2022
 - **Colonel Brightland Public School, Agra, UP**
10th | GPA: 6.88/10 | Jun 2019 – Aug 2020
-

SKILL SUMMARY

- Languages: Python, SQL, Java, JavaScript
 - Frameworks/Libraries: Pandas, NumPy, TensorFlow, Scikit-learn, Flask, Matplotlib, PyTorch, React.js
 - Tools: Power BI, Tableau, Excel, MySQL, SQLite, N8N
 - Platforms: PyCharm, Jupyter Notebook, VS Code, AWS Cloud, Render
 - Soft Skills: Team Management, Communication, Analytical Thinking
-

WORK EXPERIENCE

Data Analyst Intern | Mahesh Edible Oil Industries | On-Site | May 2025

- Processed and optimized sales and inventory data pipelines handling 5,000+ records, improving data processing efficiency by 25%
 - Extracted and analyzed business data using SAP ERP, reducing manual reporting efforts by 30%
 - Developed an ANN-based demand forecasting model achieving 80–85% prediction accuracy
 - Built interactive Power BI dashboards, reducing report generation time from 2 hours to under 30 minutes
-

PROJECTS

Connect-Too - [GitHub](#) | [Live Demo](#)

July 2024 – August 2024

Technologies: Flask, HTML, CSS, JavaScript, SQLite, Razorpay API

- Developed a web platform connecting users and service providers, supporting 100+ users in testing environment
- Integrated secure payment systems including Razorpay, UPI, Wallet, and COD
- Built an admin dashboard to manage transactions, feedback, and real-time notifications
- Improved user experience by 30% through responsive UI and interactive success animations

Fluenzy AI - [GitHub](#) | [Live Demo](#)

Technologies: AI/ML, Node.js, Python, React.js, MongoDB, LLMs, WebRTC

- Developed an AI-powered interview preparation platform with real-time voice interaction and feedback
- Implemented adaptive question generation and performance analytics, improving user performance by 25%
- Designed scalable backend systems supporting real-time processing and concurrent users
- Built intelligent user profiling to deliver personalized insights and enhance engagement by 40%

CERTIFICATES

- **Data Analyst (Virtual Experience)**

Performed cohort analysis to evaluate customer retention and lifetime value

- **Programming in Python – Infosys**

Gained a strong foundation in Python programming, problem-solving, and logical thinking

- **Power BI with DAX & AI | Nov 23, 2024**

Developed interactive dashboards and learned advanced data visualization techniques
